Professional Summary

Passionate self-taught Full Stack Web Developer with expertise in MERN seeks to contribute to innovative projects. Through independent learning and building personal projects, honed adaptability and problem-solving skills are utilised to tackle complex challenges.

EXPERIENCE

MERN Stack Developer

November 2025 – Present

Datametron India Private Ltd, Bangalore, Karnataka

- Developed and maintained full-stack web applications using MongoDB, Express.js, React.js, and Node.js.
- Collaborated with UI/UX designers, backend developers, and QA teams to ensure timely and high-quality project delivery.
- Built and integrated RESTful APIs and optimized MongoDB queries to improve application performance.
- Implemented authentication and authorization features to enhance data security and system reliability.
- Managed application deployment and monitoring on AWS for better scalability and availability.
- Participated in Agile development processes including sprint planning, task management, and code reviews.
- Delivered customized technical solutions based on client requirements and business goals.

NodeJS Developer(intership)

October 2025 – November 2025

Fegno Technologies ,Kochi, Kerala

- Contributed to the development of a full-stack HRMS (Human Resource Management System) application using Node.js, Express.js, React.js, and MongoDB.
- Worked on both frontend and backend development tasks, including UI implementation and API integration.
- Learned and utilized Docker for containerizing applications and managing the development environment.
- Participated in daily stand-up meetings and collaborated with team members in an Agile development workflow.
- Assisted in developing RESTful APIs and handling database operations for employee management features.
- Gained hands-on experience in debugging, code optimization, and version control using Git and GitHub.

Technical Skills

- Language and frameworks: JavaScript, TypeScript, Express.js
- Front-end Development: HTML, CSS, React.js, Tailwind CSS, Bootstrap, Redux, Figma, Redux Toolkit
- Back-end Development: Node.js, Express.js, MongoDB, Mongoose, Repository Architecture
- Familiar with: Git, GitHub, Postman, Data Structures and Algorithms, Nginx, NoSQL, Firebase, AWS, Razorpay, Socket.IO, SOLID Principles, JWT

Projects

WeCare - Doctor Booking Platform

[Live](#) | [GitHub](#)

WeCare is a comprehensive doctor appointment booking platform that offers all the essential features for seamless healthcare consultations.

- A healthcare appointment platform enabling users to seamlessly book consultations with certified doctors across various specializations.
- Built using **Repository Architecture** Design with separate services for user, admin, doctor, and chat modules, incorporating **Socket.IO** for real-time messaging.

- Core features include patient registration, doctor listings with availability, appointment scheduling, real-time chat with doctors, and access to medical history.
- Integrated **Stripe** for secure appointment payments.
- Deployed on cloud **AWS EC2** Instance for scalability and performance.

Technologies used: React.js, Node.js, Express.js, MongoDB, Stripe, AWS

Fashionclub - E-Commerce Web Application

[Live](#) | [GitHub](#)

Fashionclub is an advanced E-commerce web application that includes all the features necessary for a successful E-commerce store.

- Developed the Fashionclub E-commerce website using advanced technologies like **Node.js**, **MongoDB**, **Express.js**, and **EJS** to ensure a modern and efficient online shopping experience.
- Key features include Product listing, Product Management, Cart Management, Category Management, Coupon Management, Banner Management, Referral Management, Order Management, Background remover of category, Filtering, Sorting, Pagination, Account Management, Image cropping (Implicit and explicit), Sales Report, and Invoice generator.
- Integrated **Razorpay** for secure transactions, enhancing payment security within the system.
- Deployed on cloud **AWS EC2** Instance for scalability and performance.
- Integrated third-party services like **Nodemailer** to implement OTP-based login and signup process, ensuring seamless communication.

Technologies used: Node.js, Express.js, EJS, MongoDB, Razorpay, Nodemailer.

Mini Projects

Netflix - Video streaming platform

[GitHub](#)

- It's a real-time Netflix clone built with React and **TMDB API**.
- It also includes live movie trailer playing with **React Player**.

OLX - Buy and sell products

[GitHub](#)

- User-interactive platform to buy or sell products.
- Integrated **Firestore** database and utilized **Firebase Authentication** for seamless user experience.

Education

MERN Stack Development

2023 - Present

Prototype, Ernakulam

Graduation

2020 - 2023

Nest Institute Of Humanities and Basic Sciences
